GRANT WRITING INTERN

East African Power (EAP), Rwanda: August 2019 - February 2020

Perform independent research on market conditions, and develop business plans and reports for upcoming utility-sized mini hydropower projects in East Africa

Research and discover new grants which fund the company's programs and services and create funding plans and report to EAP Directors

CONSERVATION INTERN

Kitabi Ecocentre Nyungwe, Rwanda: May 2019 - August 2019

Proposed eco friendly recreational services to be implemented at the Ecocentre to improve customer engagement as well as the employees outside of work and managed to implement a volleyball pitch which we set up with the help of two other interns and made a traditional ball with the use of available natural resources and is up and running at the ecocentre which has improved customer to employee relationships as well as engagement at the ecocentre.

Discovered a new trail in the Nyungwe Buffer zone which is called the Elephant Trail which leads to a small river where Mountain Elephants used to go drink water before extinction in Nyungwe National Park which has increased the company's revenues by 5% as many people are paying to hike in that trail.

Created a website for the eco-tourism company which helped them to have an online presence and as well made it easy for their international clients to start booking online

CONSERVATION INTERN

Forestry Commission, Bulawayo, Zimbabwe: July 2018 - August 2018

Worked in the District Conservator's office accounting for all forestry produce permits which gave the District conservator and the ecologist time to focus on improving policies regarding forestry conservation.

Wrote comprehensive weekly, monthly, quarterly and half yearly reports for the Bulawayo station, District and Province to be sent to the
